

PHONE SYSTEMS

XCLUTEL integrates phone systems with desktop computing, advanced call routing, auto-attendants, multi-premise call routing via IP services, along with advanced call accounting, voicemail, unified messaging and reporting software packages.

03

“The fact that they are handling our phone systems, phone and internet service and cabling needs under one roof makes our job much easier”

An exclusive customer service experience

SMB PHONE SYSTEMS

These feature rich systems are a good fit for companies with 30 or less employees and no more than three remote locations. They can deliver multiple levels of messaging, system restore capabilities and even voicemail to email features. These systems are very adept at making you appear like a much larger organization without the much larger equipment investment.

MID-MARKET PHONE SYSTEMS

Our Mid-Market systems are designed for businesses that need flexibility and capacity for growth. They offer solutions for businesses needing between 2 and 384 phones per site. These systems can operate with traditional telephony, VoIP technology, or a combination of the two, all while offering multiple unified messaging platforms, the largest and most flexible built-in conference bridge on the market, find me/follow me mobility solutions and web conferencing capabilities. We can tailor these systems to be as complex or as simple as you need them to be.

ENTERPRISE PHONE SYSTEMS

Designed specifically for large enterprises, and the U.S. Federal Government, these systems provide a highly scalable converged solution. They incorporate leading enterprise features and applications, such as SIP support and presence-enabled call handling. These high-end server combines the scalability, reliability and networking features typically found only in carrier solutions. They are available as a pure IP telephony solution or as a hybrid solution with both TDM and IP endpoints.

XCLUTEL is a certified AVAYA SMB Expert and a CISCO Select Partner, that has the ability to provide your company with a complete integrated telephony solution tailored specifically for your business including your voice & internet access.
